Industry 5.0 – Industry for the Future

The industry of the future approach has benefits for industry, workers, and society.

"Industry 5.0" enhances the existing "Industry 4.0" approach by specifically focusing on research and innovation in order to facilitate the transition to a sustainable, human-centric, and resilient European industry.

Industry 5.0 refers to the collaboration of robots and intelligent machines with enhanced resilience and environmental objectives. Industry 5.0 seeks to add human, environmental and social aspects back into the equation, where Industry 4.0 focused on technologies such as the Internet of Things and big data. Where Industry 4.0 focused on technologies such as the Internet of Things and big data, Industry 5.0 seeks to add human, environmental and social aspects back into the focus.
