By recycling one ton of steel, we can prevent the mining of 2,500 pounds of iron ore, 1,400 pounds of coal, and 120 pounds of limestone.

Metals can be recycled time and time again without degrading. If everyone were to recycle metal, we could greatly reduce the demand for new materials that need to be mined from the earth. By recycling one ton of steel, we can prevent the mining of 2,500 pounds of iron ore, 1,400 pounds of coal, and 120 pounds of limestone.
