## Industry vs Society

**Industries can play an active role in providing solutions to challenges for society including the preservation of resources, climate change and social stability.**

The Industry of the Future approach brings benefits for industry, for workers and for society. It empowers workers, as well as addresses the evolving skills and training needs of employees. It increases the competitiveness of industry and helps attract the best talents.

It is good for our planet as it favours circular production models and support technologies that make the use of natural resources more efficient. Revising existing value chains and energy consumption practices can also make industries more resilient against external shocks, such as Covid-19 crisis.
